

# Anderson County SOIL & WATER CONSERVATION DISTRICT

## *Bulletin Board Contest*

### **Rules:**

The Bulletin Board Contest is open to any K-4<sup>th</sup> grade class in Anderson County. Bulletin board projects are a class effort and should include work of all students in the class. School groups such as science clubs, environmental clubs, or other after school programs are welcome to compete. There is no restriction on the size of the bulletin board.

### **Topic:**

A watershed is an area of land that channels rainfall and snowmelt to creeks, streams and rivers, eventually leading to outflow points such as reservoirs, bays and the ocean. Those bodies of water are all connected, so every drop that falls becomes part of one water. It is important to understand what a watershed is and why we should work to take care of our waterways. Watersheds can be any size and usually have high points of land like hills, mountains or ridges. These high points eventually feed down to lower points and then into the ocean. Hypothetically speaking, you could follow a water drop all the way from the mountains to the ocean! From the top of the mountain, all the way down to the coast, it is all one water.

### **Prizes:**

One class/group will be selected, for an **ice cream party**, on a county-wide basis. Multi-grade groups (i.e. science clubs, etc.) will be judged at the highest grade level represented by the group.

### **Deadline: March 24th, 2023**

All participating schools should contact the Anderson Soil & Water Conservation District office by March 10th to sign-up for a time to have their entries judged before the

deadline. Please contact Anaston Porter if you have any questions or need further information.
